

Customer Retention & Churn Analysis Report

Project Title

Customer Retention & Churn Analysis

Project Overview

Customer retention is one of the most important factors affecting the growth and profitability of subscription-based businesses. This project analyzes customer churn patterns and identifies the factors that influence customer retention.

Objectives

- Analyze customer churn patterns.
- Identify customer segments with high churn rates.
- Understand customer lifetime trends.
- Evaluate retention drivers.
- Provide recommendations to improve customer retention.

Tools Used

- Microsoft Power BI
- Power Query Editor
- DAX Measures

Dataset

Telco Customer Churn Dataset
Total Customers: 7,043

Key Findings

- Churn Rate: 26.5%
- Retention Rate: 73.5%
- Two-year contract customers show the highest retention.
- Fiber optic customers exhibit higher churn compared to DSL users.
- Customers with longer tenure are less likely to churn.

Recommendations

- Promote long-term contracts.
- Improve customer experience for Fiber optic users.
- Encourage automatic payment methods.
- Reward loyal customers.

Conclusion

This analysis provides actionable insights to reduce customer churn and improve customer retention.
